

I CLAIM:

1. A moist paper towel package, comprising:

a moist paper towel containing a cleansing solution;

a bag body receiving said moist paper towel therein,

5 said bag body including a top wall formed with a tear-off seam defining a pull tab precursor, said pull tab precursor having one end connected integrally and permanently to said top wall and a remaining end other than said one end, said remaining end being surrounded
10 by said tear-off seam, said tear-off seam being discontinuous at said one end of said pull tab precursor; and

a cover sheet having one side which is provided with an adhesive layer and which is adhered to said top wall,
15 said cover sheet covering entirely said pull tab precursor and said tear-off seam and covering a portion of said top wall surrounding said pull tab precursor, said tear-off seam being tearable to form said pull tab precursor into a pull tab when a portion of said cover
20 sheet is pulled away from said top wall.

2. The moist paper towel package of Claim 1, wherein said pull tab is bonded permanently to said cover sheet, and said cover sheet is adhered releasably and repositionally to said top wall.

25 3. The moist paper towel package of Claim 1, wherein said tear-off seam is in a U shape.

4. The moist paper towel package of Claim 1, wherein

said tear-off seam is formed as a perforated line.

5. The moist paper towel package of Claim 1, wherein said tear-off seam is formed as an embossed elongate dent.

5 6. The moist paper towel package of Claim 1, wherein said tear-off seam is formed as a plurality of embossed dents spaced apart from each other.

7. The moist paper towel package of Claim 1, wherein said tear-off seam is formed as a slit.

10 8. The moist paper towel package of Claim 1, wherein said cover sheet is made of a gas impermeable film.

9. The moist paper towel package of Claim 1, wherein said cover sheet is made of a material resistant to said cleansing solution contained in said moist paper

15 towels.
